SY Monument Most Popular Winter Wheat Variety Planted for 2016

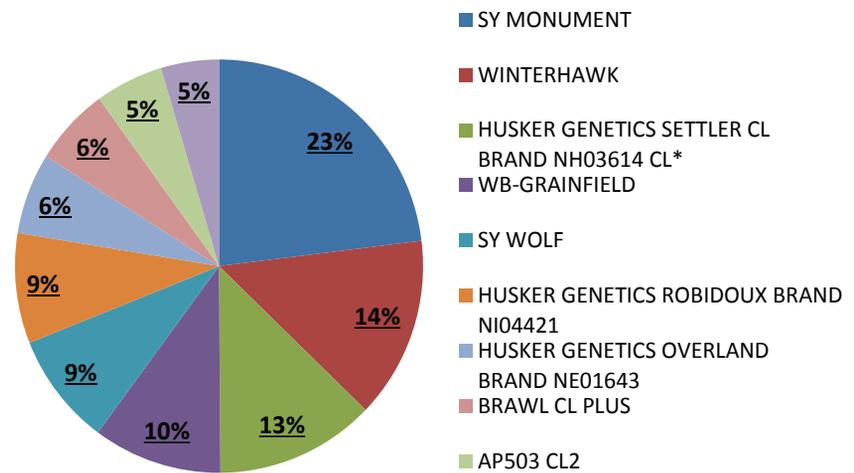

Top 3 Varieties

SY Monument was the top selling wheat seed in 2016. SY Monument is broadly adapted with good yields across the area of adaptation. This variety offers a good package. It has white chaff and is a medium-late maturing variety. It is moderate resistance to leaf and stripe rust and is a high tillering wheat with good head size and excellent acid soil tolerance, Soil-Borne Wheat Mosaic Virus resistance, good winter hardiness, and very good test weight patterns.

Winterhawk came in second on the sales charts for 2016 and is a hard red winter wheat developed by WestBred. It is a semidwarf with a medium coleoptile length around 3.25". s medium maturity variety. It is a medium tall plant. The test weight is good. Winterhawk is susceptible to Hessian fly, Greenbug, and Russian wheat aphid. It is moderately susceptible to powdery mildew and resistant to wheat soil borne mosaic virus and wheat spindle streak mosaic virus. Winterhawk is moderately susceptible to stem rust but is resistant to leaf rust and stripe rust. It is moderately resistant to wheat streak mosaic. Winterhawk has good straw strength and very good test weight. The milling and baking quality of Winterhawk is also acceptable. It has performed well in western Nebraska.

HUSKER GENETICS SETTLER CL BRAND is ranked third on the sell charts for 2016. is a moderately late maturing, semi-dwarf hard red winter wheat. The mature plant height of Settler CL is very moderate. Settler CL has moderate straw strength. The winter hardiness is good to very good. Settler CL is moderately resistant to stem rust and wheat soilborne mosaic virus. It is moderately susceptible to leaf rust, stripe rust, and Hessian fly. Settler CL also is slightly less susceptible to Fusarium head blight than many widely grown varieties. It is also susceptible to wheat streak mosaic virus.

Top 10 Wheat Varieties sold to NE Producers in 2016
